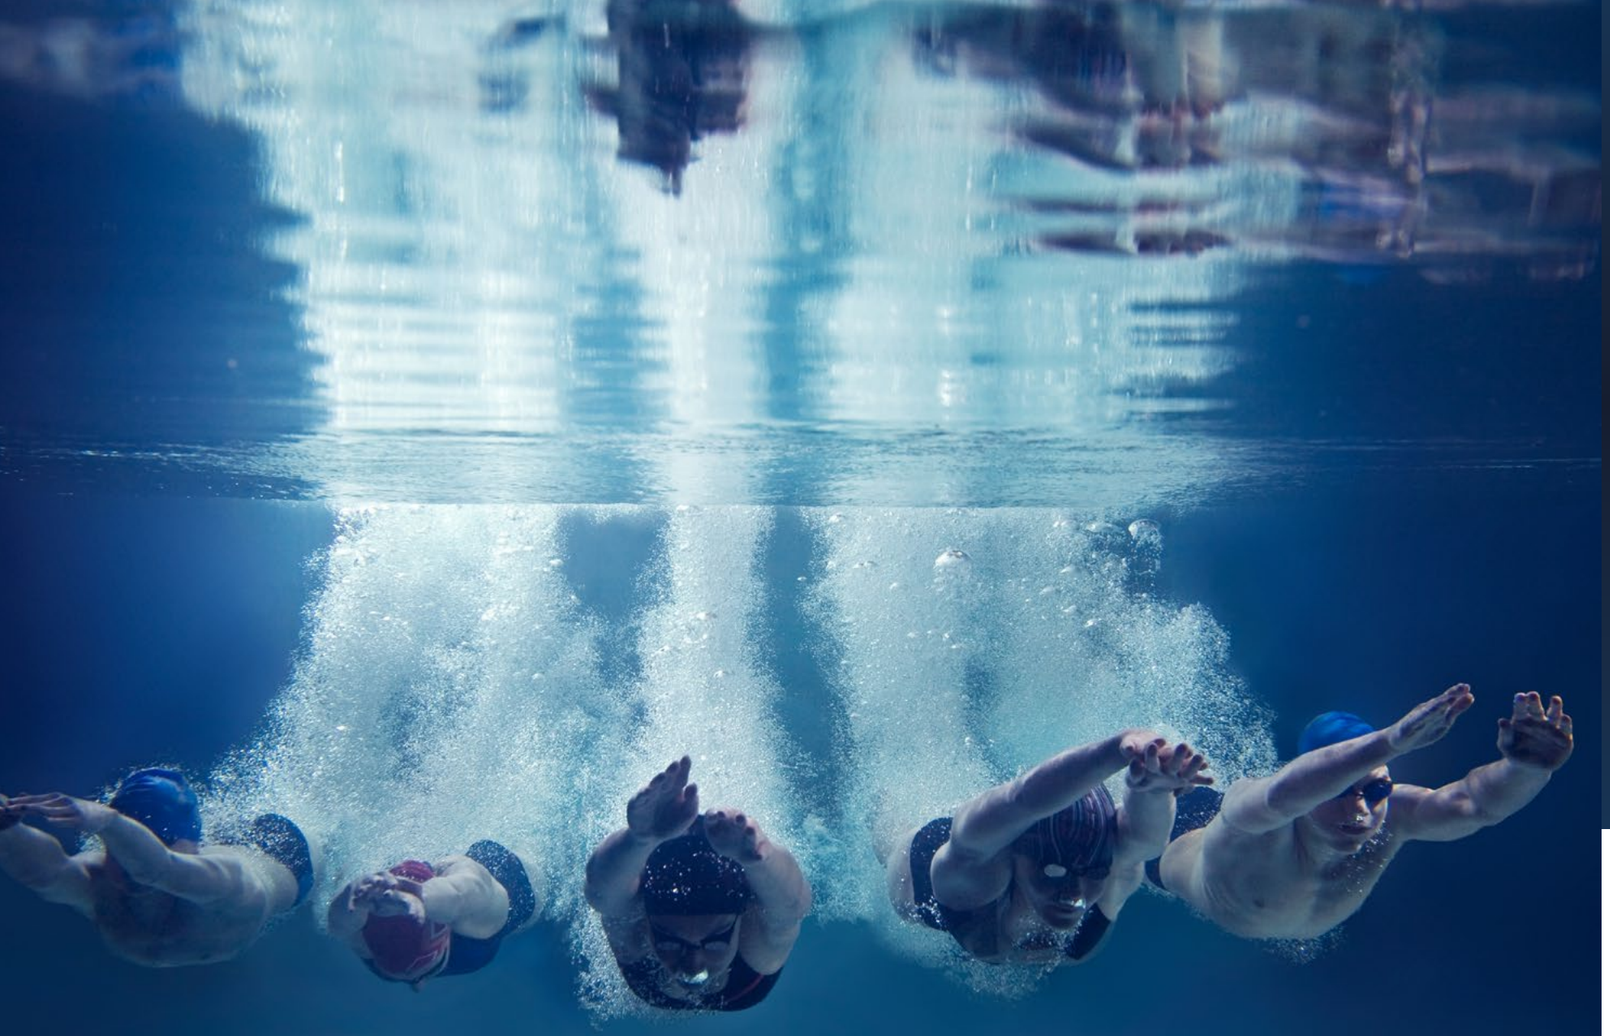
F1 LINE

High Precision Cleaning

F1 LINE POOL CLEANING ROBOTS

For You and Planet Blue.

BWT
BEST WATER TECHNOLOGY



Technology for your pool and comfort

A concentration of technologies for optimal pool cleaning with low energy consumption

The F1 pool robots clean the floor, walls, and waterline of all types of pools. Thanks to their intelligent navigation system combined with their gyroscope, the F1 robots are designed to clean your entire pool.

The brushes and filters of the F1 robots will leave your pool perfectly clean.

All F1 range robots are connected to offer you maximum comfort of use

Thanks to the BWT Home application, downloadable for free on the App Store or Play Store, control is at your fingertips!

F1 RXT

F1 RX

F1 R

THE F1 R | RX

Opening the way to a completely new world where efficiency meets style and elegance, where size gives way to precision and intelligence.

A concentration of technologies for optimal cleaning of your pool with low energy consumption.

Planetary Gear System

The F1 R & RX robots are equipped with two-stage planetary gear technology, a drive system that offers greater efficiency and better precision. Combined with two drive motors, a powerful pump, a gyroscope system, and several sensors, the F1 R & RX is one of the most reliable cleaning robots on the market.

This system is the ideal solution for fast and optimized movement, unparalleled cleaning, and incomparable reliability.

Energy Efficiency

Thanks to their fast and ergonomic movement mode and powerful suction, the F1 R and RX robots are very quick. The cleaning cycles are short, consume less energy, and provide impeccable results.

Reactive and intuitive

The F1 series robots are intuitive and reactive. A light indicator on the F1 R & RX alerts you when the filter is full and needs to be emptied. With the press of a button, the filter is released and can be removed from the top and cleaned without getting your hands dirty.

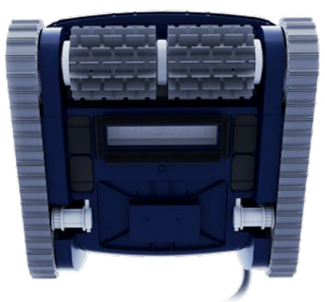
The F1 R & RX are equipped with a Bluetooth module allowing you to remotely control your robot, select and program cleaning cycles, and receive live notifications.

Compact and elegant design

Despite their compact size, the F1 R & RX's ultramodern design allows them to clean faster and more efficiently while consuming less energy.

Lightweight!

The F1 R & RX are half the weight of most traditional robots. Their quick water evacuation system makes them particularly easy to remove from the pool.



Hi-tech filtration

The F1 R & RX are equipped with ultrafine filtration that captures dust and fine particles, leaving the water crystal clear.

Effective on all surfaces

Floor, walls, waterline... thanks to its embedded technology, the F1 R & RX cling to the steepest slopes, regardless of the coating. The F1 R & RX navigate with ease and adapt to all configurations.

Their optimized cleaning path ensures total coverage, regardless of the pool's shape.

	F1 R	F1 RX
Pool Size	12 m	14 m
Cable Length	16 m	18 m
Cleaning Options	Floor, walls and waterline	Floor, walls and waterline
Cleaning Cycles	1h30 - 2h - 2h30	1h30 – 2h – 2h30
Brushes	2 x PVC	2 x PVC

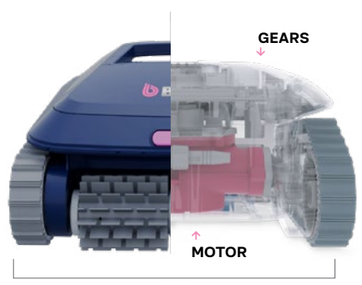
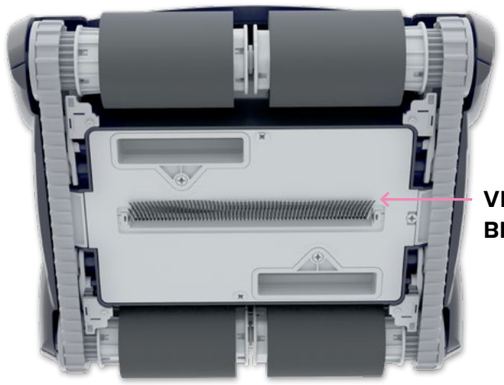
Battery Compatible	Yes	Yes
Warranty	2 years + 1 additional year	3 years + 1 additional year



THE F1 RXT



Impeccable cleaning

The F1 robot range combines all the advantages: one of the best filtration performances on the market, unbeatable suction power, exceptional agility on all surfaces, integrated intelligence, unparalleled resistance, and reliability. It is the first choice for professionals and demanding pool owners.

Compact, hydrodynamic, and energy efficient

Thanks to its compact design, the F1 RXT easily slips into tight spaces and maneuvers around elements and objects that have fallen to the pool's floor. Its hydrodynamic design reduces drag, minimizing the power needed to move through the water, leading to significant energy savings.

Fast and intelligent cleaning

The F1 RXT moves easily and cleans quickly. It is equipped with an intelligent navigation system and bidirectional suction, allowing your robot to clean throughout its cycle. Comprised of a gyroscope and an algorithm, the navigation system scans and detects obstacles, then calculates the cleaning path. The cleaning cycle is shorter, and the entire surface is covered. The pool floor, walls, and waterline are perfectly cleaned in minimal passes and record time.

User comfort & efficiency

The F1 RXT has been designed for your comfort. Its transport caddy allows you to store and position its control box, and the full filter indicator informs you when the large capacity filters need cleaning.

The application provides complete control of your robot with specific functions such as localized cleaning, turbo mode, and LED control.

F1 RX & F1 RXT

Turbo Cleaning in 45 Minutes: Experience the power of rapid cleaning with the turbo mode, which delivers a thorough floor only clean in just 45 minutes. Perfect if you have guests coming over.

Spot Cleaning: Target specific areas of your pool with spot cleaning mode via the app, allowing the robot to focus on one part of the pool for a more intensive clean.

LED Lighting: Illuminate your pool during cleaning with integrated LED lights, ensuring efficient operation even in low light conditions. Change the intensity of the lighting or turn the lights on or off.

Clean every zone and space

Floor, walls, and waterline: the F1 RXT cleans all surfaces of your pool.

Compatible with all pools

The F1 RXT is compatible with pools of all shapes and surfaces. The F1 RXT can automatically detect when it is out of the water and return to the pool when used on pools with submerged beaches; if the robot exits the water, it automatically detects and returns to the pool.

Optimized cleaning

This robot is equipped with 4 PVA brushes specially designed to be compatible with all pool surfaces. With an additional vibrating PVC brush, they ensure impeccable cleaning of your pool.

Connected

The F1 RXT model is equipped with a Bluetooth module. Thanks to the BWT Home application, downloadable for free on the App Store or Play Store, control is at your fingertips! You can start and stop your F1 RXT remotely and freely navigate to direct your device to problem areas.
